MATHAN SAKTHIVEL

Product Manager | Agentic AI | Enterprise SaaS | LLM Products
+91-8861887993 | mail2mathans@gmail.com | Chennai, India

PROFESSIONAL SUMMARY

Product Manager and AI builder with 14 years of experience leading enterprise AI and SaaS product strategy, owning 0-to-1 Agentic AI product delivery, and driving measurable business outcomes across global organizations. Deep hands-on expertise in LLM orchestration (LangChain, LangGraph, AutoGen, CrewAI), RAG pipelines, vector databases, and autonomous agent design - with 15+ AI-powered systems built and deployed in production. Proven track record of defining AI product roadmaps, driving enterprise adoption, managing cross-functional teams, and communicating AI strategy to C-suite stakeholders. Strong expertise in Responsible AI governance, AI Trust and Safety, and human-in-the-loop (HITL) workflow design. Passionate about transforming enterprise employee and customer service experiences through Agentic AI and intelligent automation.

CORE COMPETENCIES

Agentic AI Product Strategy | LLM Orchestration | RAG Pipeline Architecture | 0-to-1 Product Delivery | Enterprise SaaS PM | AI Roadmap Ownership | Responsible AI & AI Trust | Human-in-the-Loop (HITL) Design | GTM Strategy & Adoption | Stakeholder Management | Executive Communication | Cross-functional Leadership | Prompt Engineering | AI Evaluation Frameworks | Vector Databases | Multi-Agent Systems

TECHNICAL SKILLS

Agentic Frameworks: LangChain, LangGraph, AutoGen, CrewAI, Ollama, LM Studio, PEFT / LoRA
LLM Platforms: OpenAI, Anthropic Claude, OpenRouter, Hugging Face
Cloud AI: GCP Vertex AI, Azure OpenAI Service, Amazon Bedrock, AWS (EC2, S3, Lambda)
Vector Databases: pgvector, Pinecone, Chroma, Weaviate, FAISS - RAG & Semantic Search
Languages & Automation: Python (Expert), n8n (Expert), Node.js, React JS, REST APIs, JavaScript
Product & Dev Tools: JIRA, Confluence, Atlassian Suite, GitHub Copilot, Cowork, SAFe, Scrum

PROFESSIONAL EXPERIENCE

Training Expert & Head of AI - Product Manager | FPT Software | *Apr 2025 – Present*

- Own the product vision and strategy for an AI-first enterprise platform - leading the conceptualization, design, and delivery of Agentic AI workflows that autonomously resolve employee requests, automate internal service processes, and streamline cross-departmental workflows
- Lead 0-to-1 Agentic AI product delivery - building autonomous agent systems using LangGraph, AutoGen, and CrewAI that handle planning, tool use, reflection, and human-in-the-loop (HITL) handoffs for complex enterprise automation
- Own architectural decisions around LLM integration, RAG pipeline design, and agent orchestration frameworks - managing trade-offs between model performance, latency, cost, and context window optimization across production deployments
- Design AI Trust, Safety, and evaluation frameworks - building robust assessment systems to measure agent accuracy, mitigate hallucinations, manage prompt injection risks, and maintain enterprise-grade data privacy

- Define and execute AI product roadmaps - translating industry trends in Generative AI, Agentic AI, and predictive ML into scalable product features across AI Augmented, AI Application Developer, and AI Champion program tracks
- Drive GTM strategy and enterprise adoption - defining success metrics, adoption KPIs, and executive communication plans for AI platform rollout across enterprise client organizations
- Partner with engineering, data science, and UX teams - driving prioritization, resolving trade-offs, and ensuring scalable, secure, high-performance AI solutions ship on time
- Engage directly with enterprise customers - conducting discovery sessions to understand workflow pain points and translating insights into product requirements and backlog priorities
- Present AI strategy and product updates to C-suite leadership - communicating complex LLM and Agentic AI concepts to technical and non-technical executive audiences with clarity and confidence
- Build and deploy 10+ live Agentic AI systems from concept to production - including AI Digital Coworker (Teams/Slack/Jira/SharePoint integration), RAG knowledge platforms, and multi-agent orchestration systems

Manager, Gen AI Academy - Senior Product Manager, AI Platforms | GlobalLogic | *Oct 2022 – Mar 2025*

- Led enterprise AI product strategy across APAC, EMEA, and Americas - owning AI platform roadmaps, defining adoption KPIs, and governing delivery quality for 500+ enterprise developers across Fortune 500 accounts
- Designed and deployed production Agentic AI systems - multi-agent orchestration using LangChain, RAG pipelines with vector databases, LLM-powered workflow automation - integrating seamlessly with enterprise applications via APIs
- Owned product backlog and feature prioritization for GenAI platform integrations - managing end-to-end delivery from ideation through production deployment across multiple concurrent AI programs
- Drove AI Trust and Responsible AI governance - embedding ethics, compliance checkpoints, model evaluation standards, and explainability requirements throughout AI product lifecycle
- Defined and tracked AI adoption metrics - measuring platform impact through engagement rates, insight exploration depth, and decision-making velocity improvements across enterprise accounts
- Engaged enterprise customers through discovery sessions and executive briefings - translating pain points into actionable product features and roadmap priorities
- Collaborated with pre-sales teams on RFPs and SOWs - building AI product narratives, competitive positioning, and customer value frameworks that drove enterprise deals
- Evangelized Agentic AI, LLM best practices, and prompt engineering strategies - enabling 500+ developers across global enterprise accounts on GitHub Copilot and Amazon CodeWhisperer
- Benchmarked and recommended LLM strategies - evaluating OpenAI GPT, Anthropic Claude, Llama, Mistral, and open-source models for enterprise-specific performance, cost, and compliance requirements

Application Development Specialist - AI Product & Delivery | Accenture | *Aug 2021 – Oct 2022*

- Managed product delivery for a North America healthcare enterprise SaaS application - owning sprint planning, backlog prioritization, and stakeholder engagement across Agile delivery cycles using Atlassian tools
- Led cross-functional teams through sprint execution - collaborating with engineering, design, and QA to ship product features that delivered measurable client outcomes

- Conducted enterprise customer discovery sessions - understanding complex workflow pain points and translating insights into clear product requirements and prioritized roadmap decisions

Lead ETA - Enterprise AI Platform Product Owner | Infosys | *Dec 2014 – Aug 2021*

- Owned product development for Infosys Learning Platform - an enterprise-scale AI-powered platform delivering adaptive content, intelligent assessment systems, and automated workflow experiences to thousands of enterprise users
- Designed and built AI-powered enterprise platform features - adaptive content delivery, intelligent assessment engines, gamified evaluation systems, exercise validation APIs, and certification management workflows
- Analyzed competing LMS/LXP products - connecting with vendors, benchmarking features and performance, and designing platform capabilities strategically against market alternatives
- Managed product backlog, sprint planning, and stakeholder communications - ensuring platform features delivered on time, within scope, and aligned with enterprise client expectations

Software Developer & Technical Mentor | NIIT | *Sep 2012 – Dec 2014*

- Developed and maintained internal assessment and certification management platforms - building systems to track progress, manage batch activities, and process certification workflows
- Reviewed project code and mentored developers through end-to-end development cycles - guiding architecture, coding practices, and delivery standards

KEY AGENTIC AI PRODUCTS BUILT & DEPLOYED

- AI Digital Coworker - Agentic middleware integrating Teams/Slack with Jira, SharePoint, Confluence - autonomous workflow resolution and employee service automation
- Multi-Agent Orchestration System - LangGraph + AutoGen + CrewAI - ReAct, Plan-Execute-Reflect, tool-calling agent patterns for enterprise service automation
- Enterprise RAG Knowledge Platform - hybrid search RAG pipeline with vector databases, embedding models, and LLM retrieval for intelligent knowledge management
- AI Assessment Engine - Adaptive LLM-driven evaluation with skill tracing, difficulty calibration, and performance monitoring - analogous to IT/HR service request resolution
- NL-to-SQL Intelligence Engine - LLM-powered natural language query engine enabling non-technical enterprise users to access data instantly
- Email Intelligence Agent - Agentic AI processing interaction streams, extracting priorities, and delivering actionable summaries to leadership
- AI Recruitment Agent - End-to-end agentic hiring pipeline: JD parsing, candidate matching, screening, shortlisting, and automated communication
- n8n AI Workflow Automations - Production workflow automations integrating AI triggers with enterprise systems for HR, ITSM, and operations processes

EDUCATION & RESEARCH

M.Tech in Artificial Intelligence (In Progress) | SRMIST | 2026 | 9.84 CGPA

Master of Science, Information Technology | Anna University, Chennai | 2011 | 78.08%

Published Research: AI Agents - Multi-Agent Intelligent Tutoring Systems using Contextual Bandits and Bayesian Knowledge Tracing | SRMIST, 2026

Certification: SAFe Product Owner / Product Manager (POPM) - Scaled Agile, Inc. (Renewal in Progress)
